

S.NO: 22N1- UCX

Course Code: XVSK

A.D.M.COLLEGE FOR WOMEN, NAGAPATTINAM

(AUTONOMOUS)

B.Voc (Software) Degree Examination

III Semester – November – 2022

SCC VIII – ESTIMATION AND BUDGET PLANNING

Time: 3 hours

Maximum Marks: 75

50X1.5=75

Choose the Correct answer

1. The information of MIS comes from the
 - A. internal source
 - B. external source
 - C. both internal and external source
 - D. none of the above

2. The elements of control will consist of
 - A. authority, direction, management
 - B. authority, direction, information
 - C. authority, application, management
 - D. authority, application, information

3. Audit gives details about _____ to Account Payable System
 - A. account balance
 - B. transaction
 - C. expenditure
 - D. all of the above

4. One byte is made of
 - A. four bits
 - B. eight bits
 - C. twelve bits
 - D. sixteen bits

5. GDSS is the short form of
 - A. group decision support system
 - B. group discussion support system
 - C. group decision service system
 - D. group discussion support source

6. The types of data transmission modes are
 - A. half duplex., duplex. , simplex
 - B. half duplex., duplex. , simplex
 - C. half duplex., duplex. , half simplex
 - D. simplex, duplex, half triplex

7. The starting point of MIS planning is general _____ planning.
- A. objective.
 - B. managers.
 - C. business.
 - D. firms.
8. Critical information for top management is provided by _____ information system.
- A. expert.
 - B. executive.
 - C. decision.
 - D. managerial.
9. In database handling _____ reports used by software for data.
- A. condition.
 - B. specific.
 - C. periodic.
 - D. demand.
10. What are the qualities of a good s/w ?
- A. reusability
 - B. portability
 - C. inter operability
 - D. all of the above
11. _____ is an awareness and understanding of a set of information and ways that information can be made useful to support a specific task or reach a decision
- A. knowledge
 - B. data
 - C. feedback
 - D. a process
12. In company side the outsourcing people also called _____.
- A. system integrators.
 - B. system analyst.
 - C. system evaluator.
 - D. system tester.
13. _____ are individuals who help users determine what outputs they need from the system and construct the plans needed to develop the necessary programs that produce these outputs.
- A. data entry operators
 - B. programmers
 - C. database administrators
 - D. systems analysts

14. Which of the following SDLCs listed below takes an iterative approach to the systems development process?
- A. end user
 - B. rad
 - C. prototyping
 - D. traditional waterfall
15. A deterministic system operate in a predictable _____.
- A. model.
 - B. style.
 - C. process.
 - D. manner.
16. Prototype is a
- A. working model of existing system
 - B. mini model of existing system
 - C. mini model of processed system
 - D. none of the above
17. Enterprise systems support:
- A. manufacturing processes.
 - B. financial and accounting processes.
 - C. human resource processes.
 - D. all of the above.
18. Which phase is not available in software life cycle?
- A. coding
 - B. testing
 - C. maintenance
 - D. abstraction
19. Waterfall model is not suitable for?
- A. small projects
 - B. complex projects
 - C. accommodating change
 - D. none of above
20. RAD stands for:
- A. rotate application development
 - B. register application development
 - C. related application development
 - D. rapid application development

21. CASE Tool is
- A. computer aided software engineering
 - B. component aided software engineering
 - C. constructive aided software engineering
 - D. computer analysis software engineering
22. Assembling a product, identifying customers and hiring employees are:
- A. transactions
 - B. phases
 - C. business processes
 - D. business functions
23. _____ makes use of groupware technology on Internet platform for faster response Processing.
- A. e-communication
 - B. e-business
 - C. e-commerce
 - D. e-collaboration
24. Decision varies as to the _____ structure within each level of management.
- A. degree.
 - B. data.
 - C. situation.
 - D. order.
25. BPR stands for _____
- A. business process reengineering
 - B. business process reconstruction
 - C. business program reengineering
 - D. business problem report
26. Knowledge based system supports, _____
- A. knowledge of creation.
 - B. knowledge of support.
 - C. knowledge of dissemination.
 - D. all of the above.
27. A typical ERP system includes this module:
- A. financial accounting.
 - B. inventory.
 - C. bill of materials.
 - D. All of the above.
28. Which of these is not a mySAP business suite?
- A. Product lifecycle management
 - B. Supply chain management
 - C. Customer relationship management
 - D. All of the above are in the suite

29. Legacy systems:
- A. often require expensive maintenance.
 - B. may be difficult to integrate with new systems.
 - C. use a collection of independent files or databases.
 - D. All of the above.
30. Which of the following is a function that can help optimize a supply network?
- A. Supply chain collaboration
 - B. Collaborative design
 - C. Collaborative fulfilment
 - D. All of the above
31. An enterprise is a group of people with _____.
- A. common goal.
 - B. separate goal for each department.
 - C. multiple goals.
 - D. two or more goals.
32. ERP systems provide a number of benefits which include
- A. Reduced Inventory
 - B. Reduced Manpower
 - C. Reduced cycle time
 - D. All of the above
33. Enterprise resource planning (ERP)
- A. has existed for over a decade
 - B. does not integrate well with functional areas other than operations
 - C. is inexpensive to implement
 - D. automates and integrates the majority of business processes
34. Which of the following describes an ERP system?
- A. ERP systems provide a foundation for collaboration between departments
 - B. ERP systems enable people in different business areas to communicate
 - C. ERP systems have been widely adopted in large organizations to store critical knowledge used to make the decisions that drive the organization's performance
 - D. All of the above
35. Material requirements plan specify
- A. the quantities of the product families that need to be produced
 - B. the quantity and timing of planned order releases
 - C. the capacity needed to provide the projected output rate
 - D. the costs associated with alternative plans
36. Enterprise Resource Planning (ERP) is
- A. severely limited by current MRP computer systems
 - B. not related to MRP
 - C. an advanced MRP II system that ties-in customers and suppliers
 - D. not currently practical

37. ___ of the tests is a final system test performed by end users using real data over an extended period of time?
- A. final test
 - B. complete test
 - C. systems acceptance test
 - D. parallel test
38. Which of the following is(are) the deliverables of the Systems Implementation phase?
- A. training materials
 - B. functional system
 - C. physical design specification
 - D. operational system
39. A form used to record data about a transaction is a(n)
- A. batch document
 - B. source document
 - C. on-line document
 - D. data entry document
40. If you need to collect employee status information (e.g., full-time vs. part-time) on a computer screen your best choice for a GUI control would be:
- A. drop-down list
 - B. masked edit control
 - C. radio buttons
 - D. spin box
41. Optical character recognition:
- A. is less prevalent than optical mark recognition
 - B. is used on forms for subjective-based questions on exams
 - C. requires the user to carefully handwrite input data on a business form
 - D. both (a) and (c)
42. The most common medium for computer outputs is:
- A. screen
 - B. paper
 - C. E-mail
 - D. 4.microfilm
43. Which of the following reports categorizes information for managers who are not interested to wade through the details?
- A. external
 - B. detailed
 - C. exception
 - D. none of the above

44. Which kind of chart is useful for comparing series or categories of data, each in its own bar?
- A. line chart
 - B. pie chart
 - C. scatter char
 - D. bar chart
45. Which of the following is(are) the primary inputs into the task of writing and testing new programs?
- A. programming plan
 - B. database structure
 - C. test data
 - D. both (a) and (c)
46. A list of the names of all customers who purchased only one product within a six-month period would be an example of a(n):
- A. detailed report
 - B. summary report
 - C. exception report
 - D. external report
47. A turnaround output is an example of
- A. internal output
 - B. external output
 - C. summary output
 - D. exception output
48. Which of the following is NOT a general principle for output design?
- A. The distribution of (or access to) computer outputs must be sufficient to assist all relevant users.
 - B. The computer outputs should be designed with automated tools.
 - C. The computer outputs must be acceptable to the system users.
 - D. Computer outputs should be simple to read and interpret.
49. Which of the following is(are) the step(s) in the output design process?
- A. specify physical output requirements
 - B. identify system outputs and review logical requirements
 - C. design, validate, and test outputs
 - D. all of the above
50. Which of the following advanced input controls provides a nonnumeric means of selecting a value?
- A. ellipsis control
 - B. Internet hyperlink
 - C. check list box
 - D. slider edit calendar
