

7.3 Institutional Distinctiveness

A.D.M College has fostered the Academic-Industry synergy through Memorandum of Understanding (MoU). This helped to create a dynamic and mutually beneficial partnership between the academic institution and industry players.

Several educational programmes across its departments were conducted to enhance students' practical knowledge and competitive exam readiness.

By establishing MoU with industry partners, students have awaited useful opportunities with real world exposure, facilitate internships, and encourage faculty-industry collaborations for research and skill development.

Regular meetings, field visit, inviting guest lectures, internship, industry driven curriculum revision ensure the sustainability of these partnership.
