

# **A.D.M. COLLEGE FOR WOMEN**

## **(AUTONOMOUS)**

Nationally Accredited with “A” Grade by NAAC - 3rd Cycle  
(Affiliated to Bharathidasan University, Thiruchirappalli)

No.1, College Road, Velippalayam,  
Nagapattinam – 611 001, Tamil Nadu, India

**STATISTICS**

**SYLLABUS**

**(2021-2024 Batch onwards)**

**A.D.M COLLEGE FOR WOMEN (AUTONOMOUS),  
Nagapattinam**

**UG Programme – Statistics Department**

(For the candidates admitted from 2021 – 2022 onwards)

**Bloom’s Taxonomy Based Assessment Pattern**

**Knowledge Level**

<b>K1</b> – Recalling	<b>K2</b> – Understanding	<b>K3</b> – Applying	<b>K4</b> – Analyzing	<b>K5</b> – Evaluating	<b>K6</b> – Creating
-----------------------	------------------------------	-------------------------	--------------------------	---------------------------	----------------------

**1. Part I, II and III**

**Theory (External + Internal = 75 + 25 = 100 marks)**

<b>External/Internal</b>					
<b>Knowledge Level</b>	<b>Section</b>	<b>Marks</b>	<b>Hrs</b>	<b>Total</b>	<b>Passing Mark</b>
K1-K3	A (Answer all)	$10 \times 2 = 20$	3	75	30
K3-K6	B (Either or pattern)	$5 \times 5 = 25$			
K3-K6	C (Answer 3 out of 5)	$3 \times 10 = 30$			

**DEPARTMENT OF STATISTICS**  
**COURSE STRUCTURE & SCHEME UNDER CBCS**

**2021- 2024 onwards**

Sem	Part	Course Code	Course	Inst. Hrs	Credit	Exam Hrs	Marks		Total Marks
							CIA	SE	
I	III	EUA1	AC-I Statistics for Economics-I	5	3	3	25	75	100
	III	<b>CUB</b>	CC-II Statistical Methods for Business	6	5	3	25	75	100
II	III	<b>EUA2</b>	AC-II Statistics for Economics-II	5	3	3	25	75	100
	III	<b>AUA2</b>	AC-II Business Statistics for Managers	4	3	3	25	75	100
	III	<b>PGEH</b>	CC-VIII Statistical Methods for Economic Analysis	6	5	3	25	75	100
	III	<b>PGCG</b>	CC-VII Business Statistics	6	5	3	25	75	100
III	III	<b>EUA3</b>	AC-III Statistics for Economics-III	5	3	3	25	75	100
	III	<b>SUA1</b>	AC-IV Mathematical Statistics-I	4	4	3	25	75	100
	III		AC-V Statistics Practical	3	-	-	-	-	-
IV	III	<b>SUA2Y</b>	AC-V Statistics Practical	3	3	3	40	60	100
	III	<b>SUA3</b>	AC-VI Mathematical Statistics-II	3	2	3	25	75	100

**Mark Allocation for Theory Papers**

CIA	-	25 Marks
External	-	75 Marks
<b>Total</b>	<b>-</b>	<b>100 Marks</b>

**CIA Component**

Test	-	10 Marks
Assignment	-	2 Marks
Seminar	-	3 Marks
Quiz/ Group Discussion	-	5 Marks
Attendance	-	5 Marks
<b>Total</b>	<b>-</b>	<b>25 Marks</b>

**Pattern of Question Papers (Theory)**

Section A	-	10 x 2 = 20 Marks (No Choice)
Section B	-	5 x 5 = 25 Marks (Either or)
Section	-	3 x 10 = 30 Marks (Any three out of 5)
<b>Total</b>	<b>-</b>	<b>75 Marks</b>

**Mark Allocation for Practical**

CIA	-	40 Marks
Practical	-	60 Marks
<b>Total</b>	<b>-</b>	<b>100 Marks</b>

**Practical CIA Component**

Mid Semester Practical	-	10 Marks
Model Practical	-	10 Marks
Practical Skill	-	10 Marks
Record Submission	-	5 Marks
Attendance	-	5 Marks
<b>Total</b>	<b>-</b>	<b>40 Marks</b>

**Pattern of Question Paper (Practical)**

Answer any Five out of Six (5 x 10)	-	50 Marks
Record	-	10 Marks
<b>Total</b>	<b>-</b>	<b>60 Marks</b>

Semester-I / I B.A. Eco Allied Course-I	<b>Statistics for Economics - I</b>	Course Code: <b>EUA1</b>
Instruction Hours: 5	Credits: 3	Exam Hours: 3
Internal Marks: 25	External Marks:75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To impart the knowledge about collection of data.</li> <li>• To condense the mass of data.</li> <li>• To present the data in diagrams and graphs.</li> <li>• To enable the students to compute various measures of central tendency.</li> <li>• To enable the students to compute various measures of dispersion.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Introduction</b> Statistics- Definition- Scope - Functions and Limitations of Statistics. Sources of data-Primary and Secondary – Methods of collecting Primary data. – Secondary Data-Sources of collecting Secondary	<b>15Hours</b>
<b>Unit II</b>	<b>Classification and Tabulation</b> Classification of data- Objectives - Types of classification. Formation of frequency distribution (one-way classification) – problems only. Tabulation– Definition – Parts of table – rules for tabulation –Kinds of tables.	<b>15Hours</b>
<b>Unit III</b>	<b>Diagrams and Graphs</b> Diagrams – advantages - general rules for constructing diagrams (one dimensional diagram only).Line diagram – Simple bar diagram – Subdivided bar – Multiple bar diagram– Pie diagram – Simple problems. Graphs – Histogram, Frequency Polygon, Frequency curve and Ogives. Difference between diagrams and graphs	<b>15Hours</b>

<b>Unit IV</b>	<b>Measures of Central Tendency</b> Measures of central tendency- Arithmetic Mean, Median, Mode, Harmonic mean and Geometric mean– Simple problems only.	<b>15Hours</b>
<b>Unit V</b>	<b>Measures of Dispersion</b> Measures of dispersion – Range, Quartile Deviation, Standard Deviation and their Coefficients – Simple problems only (without Mean Deviation measure).	<b>15Hours</b>
<b>Textbook:</b> R.S.N. Pillai&V. Bagavathi, Statistics –S.Chand& company LTD, Reprint 2014.		
<b>Books for Reference:</b> 1. S.P. Gupta, Statistical methods- Sultan Chand and Sons, 45 <sup>th</sup> Edition 2017. 2. Pa. Navaneetham-Business tools for decision making – Jai publishers, Trichy Reprint 2014.		
<b>e- Resources:</b> 1. <a href="http://www.analyticsvidhya.com">www.analyticsvidhya.com</a> 2. <a href="http://www.makeuseof.com">www.makeuseof.com</a>		

**Course Outcomes:**

On completion of the course the learner will be able to

CO 1:	know different types of data and different methods of collection of data.
CO 2:	know different types of classification and different kinds of tables.
CO 3:	draw suitable diagrams and graphs.
CO 4:	understand different types of averages.
CO 5:	understand various measures of dispersion.

Semester-I / I B.Com Core Course-II	<b>Statistical Methods for Business</b>	Course Code: <b>CUB</b>
Instruction Hours: 6	Credits: 5	Exam Hours: 3
Internal Marks: 25	External Marks:75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Appling</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To impart the knowledge about collection and condensation of data.</li> <li>• To study various types of averages.</li> <li>• To enable the students to compute various measures of dispersion.</li> <li>• To impart the knowledge about the degree of relationship between variables and estimate unknown variable from known variable.</li> <li>• To impart the knowledge about the basics of Index Numbers</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Introduction</b> Statistics – Definition - Scope - Functions and Limitations of Statistics. Primary and Secondary data – Definition. Methods of collecting Primary data — Sources of Secondary data. Classification of data - Objectives - Types of Classification and Formation of Frequency table (one variable only). Tabulation – Definition – Parts of table – Rules for tabulation – Kinds of tables	<b>18Hours</b>
<b>Unit II</b>	<b>Measures of Central Tendency</b> Measures of central tendency- Arithmetic Mean, Median, Mode, Geometric Mean and Harmonic Mean– Simple problems.	<b>18Hours</b>
<b>Unit III</b>	<b>Measures of Dispersion, Skewness and Kurtosis</b> Measures of dispersion - Range, Quartile Deviation, Standard Deviation (without Mean Deviation) and their Coefficients - Simple problems only. Skewness - Types and Methods - Karl Pearson’s and Bowley’s Coefficient of Skewness-Simple problems. Kurtosis - definition - Types.	<b>18Hours</b>

<b>UnitIV</b>	<b>Correlation and Regression</b> Definition – Simple Correlation - Types of Correlation – Methods of Correlation : Scatter diagram– Karl Pearson’s Coefficient of Corrélation– Spearman’s Rank Correlation Coefficient (repeated and not repeated ranks) - Simple problems. Linear Regression – Lines of Regression – Simple problems	<b>18Hours</b>
<b>Unit V</b>	<b>Index Numbers</b> Index Numbers – Definition – Uses – Construction. Unweighted Index Numbers – Simple Aggregative Method and Simple Average of Relatives Method. Weighted Method – Laspeyre’s, Paasche’s and Fisher’s Index Numbers. Time Reversal and Factor Reversal tests – Simple problems	<b>18Hours</b>
<b>Textbook:</b> S.P.Gupta, Statistical methods- Sultan Chand and Sons ,45 <sup>th</sup> edition , 2017		
<b>Books for Reference:</b> 1 R.S.N.Pillai&V.Bagavathi, Statistics –S.Chand& company LTD, Reprint 2014. 2 Pa.Navaneetham-Business tools for decision making – Jai publishers ,Trichy Reprint 2014. 3 V.K.Kapoor, Modern Approach to Fundamentals of Statistics for Business and Economics - Sultan Chand and Sons, New Delhi, Reprint 2014.		
<b>e- Resources:</b> 1. <a href="http://www.analyticsvidhya.com">www.analyticsvidhya.com</a> 2. <a href="http://www.makeuseof.com">www.makeuseof.com</a>		

**Course Outcomes:**

On completion of the course the learner will have the knowledge about

CO 1:	the methods of data collection, classification and tabulation.
CO 2:	the applications of averages.
CO 3:	the problems related to measure of dispersion.
CO 4:	the applications of correlation and regression.
CO 5:	the uses and applications of the index numbers.

Semester-II / I B.A. Eco Allied Course-II	<b>Statistics for Economics-II</b>	Course Code: <b>EUA2</b>
Instruction Hours: 5	Credits: 3	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To know the distribution of data.</li> <li>• To know the types of relationship between the variables.</li> <li>• To understand cause and effect relationship between the variable.</li> <li>• To study the relation between qualitative data.</li> <li>• To study the basic concept of probability.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Skewness and Kurtosis</b> Skewness - Types and Methods - Karl Pearson's and Bowley's Coefficient of Skewness - simple problems. Kurtosis - Definition –Types (only)	<b>15Hours</b>
<b>Unit II</b>	<b>Correlation Analysis</b> Definition – Simple Correlation - Types of Correlation – Scatter diagram – Measurement of Correlation – Karl Pearson's Coefficient of Correlation – Spearman's Rank Correlation Coefficient - Simple problems.	<b>15Hours</b>
<b>Unit III</b>	<b>Regression Analysis</b> Linear Regression – Regression lines – X on Y and Y on X - Simple problems. Properties of Regression Coefficients (without proof) – Difference between Correlation and Regression.	<b>15Hours</b>
<b>Unit IV</b>	<b>Association of Attributes</b> Association of attributes (two attributes only) – Positive and Negative classes- Ultimate class frequencies- Contingency table- Consistency of data-Types of Association –Methods of determining Association – Comparison of Observed and Expected frequency method –Yule's Coefficient of Association method –Simple problems.	<b>15Hours</b>

<b>Unit V</b>	<b>Theory of Probability</b> Probability- Random Experiments- Sample Space-Types of Events – Exhaustive Events- Equally likely events- Mutually Exclusive Events- Independent Events – Mathematical and Statistical Probability. Addition and Multiplication theorems (two events only) – Simple problems.	<b>15Hours</b>
<b>Text Book:</b> R.S.N. Pillai & V. Bagavathi, Statistics –S. Chand& company LTD, Reprint 2014.		
<b>Books for Reference:</b> 1. S.P. Gupta, Statistical methods- Sultan Chand and Sons, 45 <sup>th</sup> Edition 2017. 2. Pa. Navaneetham-Business tools for decision making – Jai publishers, Trichy Reprint 2014. 3. V.K. Kapoor, Modern Approach Fundamentals of Statistics for Business and Economics - Sultan Chand and Sons, New Delhi, Reprint 2014.		
<b>e- Resources:</b> 1. <a href="http://www.analyticsvidhya.com">www.analyticsvidhya.com</a> 2. <a href="http://www.makeuseof.com">www.makeuseof.com</a>		

**Course Outcomes:**

On completion of the course the learner will have the knowledge about

CO 1:	the types of skewness and kurtosis
CO 2:	the applications of correlation analysis
CO 3:	the unknown variable and known variable.
CO 4:	the various methods of studying relation between attributes.
CO 5:	the different types of events on uncertain situations.

Semester-II / I B.B.A Allied Course-II	<b>Business Statistics for Managers</b>	Course Code: <b>AUA2</b>
Instruction Hours: 4	Credits: 3	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To impart the knowledge about collection and condensation of data.</li> <li>• To study various types of averages and SPSS -packages.</li> <li>• To enable the students to compute various measures of dispersion.</li> <li>• To impart the knowledge about the degree of relationship between variables.</li> <li>• To understand cause and effect relationship between the variable</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Introduction</b> Definition of statistics - Characteristics - uses of statistics in commerce and business. Primary and secondary data – definition. Methods of collecting primary data – characteristics of questionnaire – sources of secondary data. Classification of data: objectives – types of classification – formation of frequency distribution (one-way classification) problems only.	<b>12Hours</b>
<b>Unit II</b>	<b>Measures of Central Tendency</b> Measures of central tendency – characteristics of a good average – arithmetic mean, median, mode, geometric mean harmonic mean – Simple problems. SPSS – packages, operations and uses .	<b>12Hours</b>
<b>Unit III</b>	<b>Measures of Dispersion, Skewness and Kurtosis</b> Measures of dispersion – Range, Quartile deviation, Standard deviation and their coefficients – Simple problems only. Skewness – types and methods – Karl person’s and Bowley’s Coefficient of Skewness. Kurtosis – definition – types.	<b>12Hours</b>
<b>Unit IV</b>	<b>Correlation Analysis</b> Definition – Simple correlation - types of correlation – methods of correlation: Scatter diagram, Karl Pearson’s coefficient of correlation and Spearman’s rank correlation coefficient (repeated and not repeated ranks) – Properties of correlation coefficient (without proof) – Simple Problems.	<b>12Hours</b>

<b>Unit V</b>	<b>Regression Analysis</b>	<b>12Hours</b>
	Linear regression – definition – Lines of Regression– properties of regression coefficients (without proof) – Simple Problems. [Question paper consists of 30% theory and 70% problems]	
<b>Text Books:</b>		
S.P. Gupta, Statistical methods – Sultan Chand and Sons.		
<b>Reference Books:</b>

**Course Outcomes:**

On completion of the course, the learner will be able to

CO 1:	know the methods of data collection and classification.
CO 2:	compute various measures of averages.
CO 3:	understand various measures of dispersion and skewness.
CO 4:	discuss the applications of correlation analysis.
CO 5:	estimate the unknown values from the known values of the variables.

Semester-II/I M.A Eco Core Course-VIII	Statistical Methods for Economic Analysis	Course Code: <b>PGEH</b>
Instruction Hours: 6	Credits: 5	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To study the important measures of central tendency and dispersion</li> <li>• To impart the knowledge about the degree of relationship between variables</li> <li>• To understand cause and effect relationship between the variable</li> <li>• To create an overview about sampling and its various methods</li> <li>• To study the different types of testing of hypotheses.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Measures of Averages and Dispersions</b> Measures of Averages, Definition, Characteristics of a good Measure of Average - Mean, Median and Mode - Definition, Merits and Demerits (Simple Problems). Measures of Dispersions - Definition, Characteristics of a good measure of dispersion - Standard Deviation - Definition, Merits and Demerits, Coefficient of Variation, (Simple Problems).	<b>18Hours</b>
<b>Unit II</b>	<b>Correlation Analysis</b> Correlation Analysis - Definition, Types, Methods of Finding Correlation Coefficient - Scatter Diagram, Karl Pearson, Spearman's Rank Correlation Coefficient, Concurrent Deviations Method - Properties of Correlation Coefficient. (Only statement Withoutproof) - Simple Problems.	<b>18Hours</b>
<b>Unit III</b>	<b>Regression Analysis</b> Regression Analysis –Definition, Types, Lines of Regression - Properties of Regression Co- Efficient- (Without proof) - Difference Between Correlation and Regression Analysis. (Simple Problems).	<b>18Hours</b>
<b>Unit IV</b>	<b>Sampling Methods</b> Sampling- Definition, Uses of sampling. Random Sampling- Simple Random Sampling Stratified Random Sampling, Systematic Random Sampling - Definition, Merits and Demerits, Non-random sampling - Purposive, Quota and Judgement sampling. (Only Theory).	<b>18Hours</b>

<b>Unit V</b>	<b>Testing of Hypothesis</b> Sampling distribution of Mean, Standard Error- Uses of Standard Error - Testing of Hypothesis - Test Procedure - Type I error, Types II error - One Tailed & Two Tailed Tests, - t - test- Test of Significance for Single Mean and Difference between Two Means, Chi square test-Testing the Independence of Two Attributes, (Simple Problems).	<b>18Hours</b>
<b>Text Books:</b>

**Course Outcomes:**

On completion of the course, the learner will have the knowledge about

CO 1:	the problems related to mean, median, mode and standard deviation.
CO 2:	the applications of correlation analysis.
CO 3:	the unknown values and the known values of the variables.
CO 4:	the application of sampling techniques.
CO 5:	the application of t-test and chi square test.

Semester-II / I M.Com Core Course- VII	<b>Business Statistics</b>	Course Code: <b>PGCG</b>
Instruction Hours: 6	Credits: 5	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>To create an overview about sampling and its various methods.</li> <li>To impart the knowledge about the degree of relationship between variables and estimate unknown variable from known variable.</li> <li>To study the various components of Time series.</li> <li>To impart the basic concept of probability and its probability distributions.</li> <li>To study the different types of test of hypotheses.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Statistical Survey and Sampling Methods</b> Statistical Survey – Planning and Execution of the Survey. Methods of Sampling – Probability Sampling – Simple Random Sampling- Stratified Sampling- Systematic Sampling- Cluster Sampling. Non- Probability Sampling – Judgement Sampling, Quota Sampling, Convenience Sampling. Sampling and Non-Sampling Errors.	<b>18Hours</b>
<b>Unit II</b>	<b>Correlation and Regression Analysis</b> Simple Correlation: Definition – Types of Correlation – Methods of Correlation - Karl Pearson’s Coefficient of Correlation – Properties of Correlation Coefficient (no proof) – Spearman’s Rank Correlation Coefficient (repeated and not repeated ranks) - Simple problems. Linear Regression – Lines of Regression – Properties of Regression Coefficients (without proof) – Simple problems	<b>18Hours</b>
<b>Unit III</b>	<b>Time Series Analysis</b> Time Series – Definition – Uses – Components – Measurement of trend – Moving Average Method – Least Square Method (linear model only) – Measurement of Seasonal variation – Simple Average Method -Simple problems.	<b>18Hours</b>
<b>Unit IV</b>	<b>Probability and Distributions</b> Probability – Mathematical and Statistical Probability –Types of Events -	<b>18Hours</b>

	Addition and Multiplication Theorems – Simple Problems. Random Variable – Definition of Discrete and Continuous Random Variable. Binomial, Poisson and Normal Distributions – Definition – Properties (Without Proof) - Simple Problems. (No Derivations and Fitting of Distributions).	
<b>Unit V</b>	<p><b>Testing of Hypothesis</b></p> <p>Concept of Sampling Distribution and Standard Error- Uses of Standard Error. Test of Hypothesis – Null and Alternative Hypothesis – Type I and Type II Errors – One Tailed and Two Tailed Tests – Level of Significance – Procedure of Testing Hypothesis -- Tests of Significance – Large Sample Test: Test for Single Proportion, Difference of Proportions, Single Mean, Difference of Means – Simple problems. Small Sample Tests - Student’s t – Applications of t – t-test for Single Mean, Difference of Means – Paired t- test.–and Chi Square Test for Independence of Attributes. F-Test for Equality of Variances -Analysis variance- Simple problems.</p>	<b>18Hours</b>
<b>Text Book:</b>

**Course Outcomes:**

On completion of the course, the learner will have the knowledge about

CO 1:	the statistical survey and sampling techniques.
CO 2:	the correlation and regression analysis.
CO 3:	the uses and applications of Time series analysis.
CO 4:	the problems related to probability and basic concept of probability distributions.
CO 5:	the various statistical tools to apply for a research.

Semester-III/ II B.A. Eco. Allied Course-III	<b>Statistics for Economics-III</b>	Course Code: <b>EUA3</b>
Instruction Hours: 5	Credits: 3	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Applying</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To impart the knowledge about the theoretical distributions.</li> <li>• To study the different methods of Index numbers.</li> <li>• To understand the various components of Time series.</li> <li>• To create an overview about Sampling and its various methods.</li> <li>• To know the basic concepts of Vital Statistics.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Distributions</b> Random variables-discrete and continuous -Binomial distribution, Poisson distribution – Simple problems. (no derivations and fitting of distributions) - normal distribution – definition – their properties.	<b>15Hours</b>
<b>Unit II</b>	<b>Index Numbers</b> Index numbers – definition – uses – construction. Unweighted method – simple aggregative method and simple average of relatives method. Weighted method – Laspeyre’s, Paasche’s and Fisher’s index numbers. Time reversal and Factor reversal tests – Simple problems.	<b>15Hours</b>
<b>Unit III</b>	<b>Time Series</b> Analysis of time series – definition –uses –components of time series –secular trend – seasonal variations- cyclical variations –irregular variations – measurement of trend – method of moving averages – method of least squares (linear model only) – Simple problems.	<b>15Hours</b>

<b>Unit IV</b>	<b>Sampling Methods</b> Sampling techniques – definition of Census and Sample methods. Random and Non- Random Sampling. - Probability Sampling - Simple Random Sampling, Stratified Random Sampling and Systematic Random Sampling.	<b>15Hours</b>
<b>Unit V</b>	<b>Vital Statistics</b> Vital statistics – definition and uses – methods of obtaining Vital Statistics – Registration method, Census method, Analytical method. Crude birth rate specific birth rate and crude death rate, and Standardized death rate.	<b>15Hours</b>
[Question paper consists of 30% theory and 70% problems]		
<b>Textbook:</b> R.S.N. Pillai & V. Bagavathi, Statistics –S. Chand & company LTD, Reprint 2014.

**Course Outcomes:**

On completion of the course, the learner will have the knowledge about

CO 1:	the different types of distributions.
CO 2:	the various methods of index numbers.
CO 3:	the uses and applications of Time series.
CO 4:	the application of sampling techniques.
CO 5:	the uses and methods for collecting vital statistics.

Semester-III /II B.Sc Maths Allied Course-IV	<b>Mathematical Statistics-I</b>	Course Code : <b>SUA1</b>
Instruction Hours: 4	Credits: 4	Exam Hours: 3
Internal Marks: 25	External Marks: 75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Appling</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To equip the knowledge of probability.</li> <li>• To acquire knowledge about one dimensional random variables.</li> <li>• To impart knowledge about two dimensional random variables.</li> <li>• To impart the knowledge about mathematical expectation.</li> <li>• To study the discrete probability distributions.</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Theory of Probability</b> Probability – Mathematical and Statistical Probability, Axiomatic approach to Probability - Addition and multiplication theorem (two events only) - Boole’s inequality – Simple problems.	<b>12Hours</b>
<b>Unit II</b>	<b>One Dimensional Random Variables</b> Random variables – concepts – one dimensional random variable – discrete and continuous r.v – probability mass function – probability density function – distribution function – Simple problems.	<b>12Hours</b>
<b>Unit III</b>	<b>Two Dimensional Random Variables</b> Two dimensional random variables – discrete – continuous random variables – marginal, conditional probability functions – Simple problems.	<b>12Hours</b>
<b>Unit IV</b>	<b>Mathematical Expectation</b> Mathematical expectation – definition – properties of expectation (with proof). Moments – relation between raw moments and central moments only– their relations. Variance –properties of variance, covariance (concept only) – Simple problems – conditional expectations and conditional variance (concept only) – Simple problems.	<b>12Hours</b>

<b>Unit V</b>	<b>Discrete Probability Distributions</b> Concept of Moment Generating Function (m.g.f)- Cumulant Generating Function (c.g.f)- Characteristic function. Binomial and Poisson distribution – definition – moments- mean and variance only - recurrence relation for the moments – Moment generating function - Characteristic function - Simple problems only.	<b>12Hours</b>
<p><b>Text Book:</b> S.C. Gupta &amp;V.K.Kapoor , Fundamentals of Mathematical Statistics- Sultan Chand and Sons,11<sup>th</sup> Edition ,2014</p> <p><b>Unit I:</b> Chapter 3 - 3.1, 3.3, 3.4, 3.5, 3.9, 3.9.1, 3.9.3, 3.11, 3.12, 3.13</p> <p><b>Unit V:</b> Chapter 8 - 8.4, 8.4.1, 8.4.2 ,8.4.6, 8.4.7, 8.4.8, 8.5, 8.5.2, 8.5.4,8.5.5 8.5.6, 8.5.7, 8.5.8</p>		
<p><b>Reference Books:</b></p> <ol style="list-style-type: none"> <li>1. S.P. Gupta, Statistical methods- Sultan Chand and Sons, 45<sup>th</sup> Edition 2017</li> <li>2. R.S.N.Pillai&amp;V.Bagavathi, Statistics –S.Chand&amp; company LTD, Reprint 2014.</li> </ol>		
<p><b>e- Resources:</b></p> <ol style="list-style-type: none"> <li>1. <a href="http://www.dcehvpm.org">http://www.dcehvpm.org</a></li> <li>2. <a href="https://pdfbooksforstd.blogspot.com">https://pdfbooksforstd.blogspot.com</a></li> </ol>		

**Course Outcomes:**

On completion of the course, the learner will be able to

CO 1:	apply the theory of probability.
CO 2:	utilize one dimensional random variables.
CO 3:	compute two dimensional random variables.
CO 4:	discuss the mathematical expectation.
CO 5:	explain discrete probability distributions.

Semester-III & IV / II B.Sc Maths Allied Course-V	<b>Statistical Practical</b>	Course Code: <b>SUA2Y</b>
Instruction Hours: 3	Credits: 3	Exam Hours: 3
Internal Marks: 40	External Marks: 60	Total Marks: 100

<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>To impart the knowledge about measures of central tendency, dispersion and skewness</li> <li>To understand the various measures of discrete probability distribution</li> <li>To understand fitting of Binomial, Poisson and Normal distributions</li> <li>To impart the knowledge about the degree of relationship between variables and estimate unknown value from known value</li> <li>To study the different types of testing of hypothesis</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Measures of Central Tendency, Dispersion and Skewness</b> Calculation of Mean, Median, Mode, Geometric mean, Harmonic mean, Quartile deviation, Standard deviation and their coefficients. Skewness – Karl Pearson’s and Bowley’s coefficient of Skewness.	<b>9Hours</b>
<b>Unit II</b>	<b>Discrete Probability Distribution</b> Calculation of Mean and Standard deviation for discrete probability distributions. Marginal and Conditional probabilities, expectations, variances, conditional expectations, conditional variance, covariance and correlation for bivariate discrete probability distributions.	<b>9Hours</b>
<b>Unit III</b>	<b>Fitting of Binomial, Poisson and Normal Distribution</b> Fitting of Binomial, Poisson and Normal distribution (area method only).	<b>9Hours</b>
<b>Unit IV</b>	<b>Correlation and Regression</b> Calculation of Karl Pearson’s Coefficient of Correlation, Spearman’s Rank Correlation Coefficient (repeated and not-repeated ranks). Lines of Regression.	<b>9Hours</b>
<b>Unit V</b>	<b>Testing of Hypothesis</b> Tests of significance: Large sample tests for single proportion, difference of proportions, single mean, difference of means and difference of standard deviations. Small sample tests: t-test for single mean, difference of means and paired t-test. F – test for equality of variances. Chi square test for independence of attributes.	<b>9Hours</b>

(Five questions must be answered out of six questions. At least one question should be taken from each unit. Each question carries ten marks)

**Text Book:**

S.C. Gupta & V.K. Kapoor, Fundamentals of Mathematical Statistics- Sultan Chand and Sons, 11<sup>th</sup> Edition, 2014

**Reference Books:**

1. S.P. Gupta, Statistical methods- Sultan Chand and Sons, 45<sup>th</sup> Edition 2017
2. R.S.N. Pillai & V. Bagavathi, Statistics – S. Chand & company LTD, Reprint 2014.

**e- Resources:**

1. <http://www.dcehvpm.org>
2. <https://pdfbooksforstd.blogspot.com>

**Course Outcomes:**

On completion of the course the learner will be able to

CO 1:	know about measures of central tendency, dispersion and skewness
CO 2:	apply various measures of discrete probability distribution
CO 3:	utilize fitting of Binomial, Poisson and Normal distributions
CO 4:	compute correlation coefficients and regression equations.
CO 5:	use large sample and small sample tests.

Semester-IV /II B.Sc. Maths Allied Course-VI	<b>Mathematical Statistics-III</b>	Course Code: <b>SUA3</b>
Instruction Hours: 3	Credits: 2	Exam Hours: 3
Internal Marks -25	External Marks-75	Total Marks: 100

<b>Cognitive Level</b>	<b>K1-Recalling</b> <b>K2-Understanding</b> <b>K3-Appling</b> <b>K4-Analyzing</b> <b>K5-Evaluating</b> <b>K6-Creating</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To impart the knowledge about the degree of relationship between variables and estimate unknown variable from known variable.</li> <li>• To acquire knowledge about normal distribution.</li> <li>• To impart the knowledge about exact sampling distribution.</li> <li>• To study large sample tests</li> <li>• To study small sample tests</li> </ul>	
<b>UNIT</b>	<b>CONTENT</b>	<b>HOURS</b>
<b>Unit I</b>	<b>Continuous Distribution</b> Normal distribution – definition– properties of Normal distribution -mode - median -moment generating function- moments of normal distribution. Uniform distribution – definition- mean and variance.	<b>9Hours</b>
<b>Unit II</b>	<b>Correlation and Regression Analysis</b> Correlation (two variables only) – Karl Pearson’s Coefficient of Correlation and its properties. Spearman’s Rank Correlation Coefficient (repeated and non-repeated). Lines of Regression – definition – properties of Regression Coefficients – Simple problems.	<b>9Hours</b>
<b>Unit III</b>	<b>Exact Sampling Distributions</b> Sampling distributions – Chi Square distribution– definition, derivation of the distribution and its mean and variance only. Student’s t- distribution – definition, derivation of the distribution and its mean and variance only, F- distribution – definition - derivation of the distribution and its mean and variance only. Relationship among t, F & Chi Square distribution.	<b>9Hours</b>

<b>Unit IV</b>	<b>Large Sample Tests</b> Test of hypothesis – null and alternative, type I and type II errors, one tailed and two tailed tests, level of significance, Procedure for testing hypothesis. Test of significance – large sample tests; test of significance for single proportion, difference of proportions, single mean, difference of means –Simple problems.	<b>9Hours</b>
<b>Unit V</b>	<b>Small Sample Tests</b> Small sample tests – t-test for single mean, difference of means and paired t-test. F-test for equality of variances - Simple problems.	<b>9Hours</b>
<p><b>Text Book:</b> S.C. **Course Outcomes:**

On completion of the course, the learner will be able to

CO 1:	compute correlation coefficients and regression equations.
CO 2:	identify the applications of normal distribution.
CO 3:	explain exact sampling distribution.
CO 4:	apply large sample tests.
CO 5:	use small sample tests.
